Languages

English
(B2)

French
(Native)

Technical Skills

Programming & Frameworks
Python, NodeJs, ReactJs, C, Django, Flask, REST APIs, OOP

Databases
PostgreSQL, SQLite, MongoDB

Data & AI
Scikit-learn, supervised learning, classification, feature engineering, NLP, LLMs & Transformers, Data Processing, Power BI (DAX, Fabric), Plotly, Pandas, NumPy

Development & Collaboration Tools
Git, GitHub, GitLab, Microsoft Azure, ArgoCD, Grafana, ClickUp, Trello

Operating Systems & Virtualization
Windows / Linux installation, virtual machines

Strengths

Adaptability
Flexibility
Autonomy
Teamwork
Communication
Problem solving

Interests

Reading / Philosophy / Psychology
History
Music

Soraya Codo

Software Engineer | Backend | Data & AI

Python backend / data / ML profile, passionate about designing end-to-end solutions. Solid experience in building reliable APIs and pipelines, production monitoring (observability, stability), and integrating Machine Learning (NLP, LLMs, RAG, Prompt Engineering).

Education

Software quality in computing
From Sept. 2026 to Dec. 2026 Université de Laval

Master's in Artificial Intelligence & Data Management
Since Sept. 2024 Nexa Digital School

Business Mathematics
From May 2024 to July 2024 Université de Laval

Bachelor in Computer Science
From 2020 to 2023 Epitech Technology

Professional Experience

Software Engineer
From Sept. 2025 to Oct. 2026 Slb (Schlumberger) Montpellier, France

- Microservice Development: authorization middlewares, multi-environment configuration, and evolution of data flow services.
- Bug Investigation & Resolution across services, with log analysis and end-to-end debugging.
- Code Reliability via unit tests, integration tests, and production log analysis.
- Backend Migration to a new microservices architecture, minimizing functional regressions.
- PowerBI Dashboards (product adoption, software versions, user activity, session distribution)

Tech stack: Python, OSDU, Techlog, Ocean Plugin, PowerBI, Grafana, Microsoft Azure, Insomnia, ArgoCD, aiohttp

Software Engineer
From Apr. 2023 to Sept. 2023 GéoDigital Cotonou, LI, Benin

- Django Backend Development: authentication, permissions, and API endpoints
- Backend Architecture for a nationwide activity-monitoring platform
- Automated Testing for code quality and maintainability
- REST API Integration with React frontend for seamless data flow

Tech stack: Django, ReactJs, Postman, Gitlab

Python Backend Developer
From Oct. 2022 to Mar. 2023 Fasfox

- Data Pipeline Development: collection and structuring of business information across France.
- Event-Management API for internal workflow and productivity improvement.

Tech stack: Django, Flask, Gitlab

Featured Projects

Gambling-Related Spending Prediction
Predictive model estimating spending patterns from behavioral data (Python, Machine Learning)

Human Rights RAG Chatbot
Python-based multi-PDF ingestion and semantic search over law texts using LangChain, Hugging Face embeddings (Sentence-Transformers) and ChromaDB

NLP - Covid-19 Classification
Trained a text-classification model on Covid-19 posts from X using NLP preprocessing and ML pipelines

Volunteering

Python Tutor
Since Jan. 2026 Nexa Digital School Lyon, France
Mentored beginner students in Python fundamentals, designing exercises tailored to non-technical profiles

IT Manager
From Apr. 2025 to Aug. 2025 Ab-project-ee Paris

- Developed a blood-donation tracking application.
- Led data collection via web scraping.
- Managed an agile team to deliver features efficiently.

Tech stack: Django, Python, VueJs, ClickUp
