Languages

English
(B2)

French
(Native)

Technical Skills

Programming & Frameworks
Python, NodeJs, ReactJs, C / C++, Django, Flask, REST APIs, OOP

Databases
PostgreSQL, SQLite, MongoDB

Data & AI
Scikit-learn, supervised learning, classification, feature engineering, NLP, LLMs & Transformers, Data Processing, Power BI (DAX, Fabric), Plotly, Pandas, NumPy

Development & Collaboration Tools
Git, GitHub, GitLab, Microsoft Azure, ArgoCD, Grafana, ClickUp, Trello

Operating Systems & Virtualization
Windows / Linux installation, virtual machines

Strengths

Adaptability
Flexibility
Autonomy
Teamwork
Communication
Problem solving

Interests

Reading / Philosophy / Psychology
History
Music

Soraya Codo

Software Engineer | Backend | AI & Data

Backend Python Engineer applying Machine Learning to real-world data problems: REST APIs, production data pipelines, NLP classification, and semantic search (RAG). 3+ years of experience across backend development (Django/Flask), production monitoring (ArgoCD/Grafana), and applied data science.

Education

Master's in Artificial Intelligence & Data Management
Since Sept. 2024 Nexa Digital School Lyon, France

Business Mathematics
From May 2024 to July 2024 Université de Laval

Bachelor in Computer Science
From 2020 to 2023 Epitech Technology

Professional Experience

Software Engineer
From Sept. 2025 to Oct. 2026 Slb (Schlumberger) Montpellier, France

- Developed features on the MRB (Metering & Revenue Billing) module: authorization middlewares, multi-environment config
- Investigated and fixed bugs across importer/exporter modules
- Ensured code reliability via unit testing and ArgoCD/Grafana log analysis
- Migrated the data sharing backend to a new service
- Built Power BI dashboards (product adoption, version usage, user activity, sessions)

Tech stack: Python, OSDU, Techlog, Ocean Plugin, PowerBI, Grafana, Microsoft Azure, Insomnia, ArgoCD, Cockatoo

Software Engineer
From Apr. 2023 to Sept. 2023 GéoDigital Cotonou, LI, Benin

- Designed and deployed Django backends with authentication, permissions, and API endpoints
- Built backend architecture for a nationwide activity-monitoring platform
- Implemented automated tests for code quality and maintainability
- Integrated REST APIs with React frontend for seamless data flow

Tech stack: Django, ReactJs, Postman, Gitlab

Python Backend Developer
From Oct. 2022 to Mar. 2023 Fasfox

- Built data pipelines to collect and structure business information across France.
- Developed an event-management API to improve internal workflows and team productivity.

Tech stack: Django, Flask, Gitlab

Featured Projects

Gambling-Related Spending Prediction
Predictive model estimating spending patterns from behavioral data (Python, Machine Learning)

Human Rights RAG Chatbot
Python-based multi-PDF ingestion and semantic search over law texts using LangChain, Hugging Face embeddings (Sentence-Transformers) and ChromaDB

NLP - Covid-19 Classification
Trained a text-classification model on Covid-19 posts from X using NLP preprocessing and ML pipelines

Volunteering

Python Tutor
Since Jan. 2026 Nexa Digital School Lyon, France
Mentored beginner students in Python fundamentals, designing exercises tailored to non-technical profiles

IT Manager
From Apr. 2025 to Aug. 2025 Ab-project-ee Paris

- Developed a blood-donation tracking application.
- Led data collection via web scraping.
- Managed an agile team to deliver features efficiently.

Tech stack: Django, Python, VueJs, ClickUp
