Soraya Codo

Software Engineer | Backend | AI & Data - 3+ years of experience

AI & Software Engineer | Master's Graduate (October 2026).
Armed with a Master's degree in AI & Data Management and hands-on experience building scalable backend systems, I have a strong ability to turn business needs into reliable, scalable systems. My goal is to actively contribute to impactful projects while deepening my expertise.

Professional Experience

Software Engineer (Apprenticeship)
From Sept. 2025 to Oct. 2026 Slb (Schlumberger) Montpellier, France
- Developed Power BI dashboards, improving engagement tracking and business analytics.
- Implemented Python features for Techlog plugins with technical documentation.
- Built and executed unit tests to increase code reliability and reduce defects.
- Collaborated in an Azure-based environment using CI/CD and monitoring tools.
  Tech stack: Python, Power BI, Grafana, Microsoft Azure, Insomnia, ArgoCD

Software Engineer (Internship)
From Apr. 2023 to Sept. 2023 GéoDigital Cotonou, LI, Benin
- Designed and deployed Django backend systems with authentication, permissions, and API endpoints.
- Built backend architecture for a nationwide activity-monitoring platform.
- Implemented automated tests to ensure code quality and maintainability.
- Integrated REST APIs with React frontend for seamless data flow.
  Tech stack: Django, ReactJs, Postman, Gitlab

Software Engineer (Apprenticeship)
From Oct. 2022 to Mar. 2023 Fasfox
- Built data pipelines to collect and structure business information across France.
- Developed an event-management API to improve internal workflows and team productivity.
  Tech stack: Django, Flask, Gitlab

Volunteering

Python Tutor
Since Jan. 2026 Nexa Digital School Lyon, France
Supporting beginners in learning programming fundamentals.

IT Manager
From Apr. 2025 to Aug. 2025 Ab-project-ee Paris
- Developed a blood-donation tracking application.
- Led data collection via web scraping.
- Managed an agile team to deliver features efficiently.
  Tech stack: Django, Python, VueJs, ClickUp

IT Coach
From 2022 to 2023 Projet PAC - Techchild
Introduced high-school students to web development.

Academic & Personal Projects

Human Rights RAG Chatbot (LangChain + ChromaDB)
Python-based multi-PDF ingestion and semantic search over law texts using LangChain, Hugging Face embeddings (Sentence-Transformers) and ChromaDB

NLP (Natural Language Processing)
Trained a text-classification model on Covid-19 posts from X using NLP preprocessing and ML pipelines.

Education

Master's in Artificial Intelligence & Data Management
Since Sept. 2024 Nexa Digital Scholl Lyon, France

Business Mathematics
From May 2024 to July 2024 Université de Laval

Bachelor in Computer Science
From 2020 to 2023 Epitech Technology

Scientific Baccalaureate
From 2012 to 2019 College Catholique Don Zéfirino Agostini
