Soraya Codo

Software Engineer | Backend | AI & Data - 5+ years of experience

Master's student in Artificial Intelligence & Data Management with hands-on experience delivering software, data, and AI solutions. Strong ability to turn business needs into reliable, scalable systems. My goal is to actively contribute to impactful projects while deepening my expertise.
Available for a full-time position starting October 2026.

Professional Experience

Software Engineer (Apprenticeship)

From September 2025 to October 2026 Slb (Schlumberger) Montpellier, France

- Developed Power BI dashboards, improving engagement tracking and business analytics.
- Implemented Python features for Techlog plugins; delivered technical documentation.
- Built and executed unit tests to increase code reliability and reduce defects.
- Collaborated in an Azure-based environment using CI/CD and monitoring tools.

Tech stack: Python, PowerBi, Grafana, Microsoft Azure, Insomnia, Argocd

Software engineer (Internship)

From April 2023 to September 2023 GéoDigital Cotonou, LI, Benin

- Designed and deployed Django backend systems with authentication, permissions, and API endpoints.
- Built backend architecture for a nationwide activity-monitoring platform.
- Implemented automated tests to ensure code quality and maintainability.
- Integrated REST APIs with React frontend for seamless data flow.

Tech stack: Django, ReactJs, Postman, Gitlab

Software Engineer (Apprenticeship)

From October 2022 to March 2023 Fasfox

- Built data pipelines to collect and structure business information across France.
- Developed an event-management API to improve internal workflows and team productivity.

Tech stack: Django, Flask, Gitlab

Volunteering

Python Tutor

Since January 2026 Nexa Digital School Lyon, France
Supporting beginners in learning programming fundamentals.

IT Manager

Since April 2025 Ab-project-ee Paris

- Developed a blood-donation tracking application.
- Led data collection via web scraping.
- Managed an agile team to deliver features efficiently.

Tech stack: Django, Python, VueJs, ClickUp

IT Coach

From 2022 to 2023 Projet PAC - Techchild
Introduced high-school students to web development.

Academic & Personal Projects

Time Series Data Analysis
Python-based analysis of 10 years of Bitcoin/Ethereum data using Pandas, NumPy, Plotly.

NLP (Natural Language Processing)
Trained a text-classification model on Covid-19 posts from X using NLP preprocessing and ML pipelines.

Education

Master's in Artificial Intelligence & Data Management

Since September 2024 Nexa Digital Scholl Lyon, France

Business Mathematics

From May 2024 to July 2024 Université de Laval

Bachelor in Computer Science

From 2020 to 2023 Epitech Technology

Scientific Baccalaureate

From 2012 to 2019 College Catholique Don Zéfirino Agostini
