Languages

English
(B2)

French
(Native)

Technical Skills

Programming & Frameworks
Python, NodeJs, ReactJs, C / C++, Django, Flask, REST APIs, OOP

Databases
PostgreSQL, SQLite, MongoDB

Data & AI
Scikit-learn, supervised learning, classification, feature engineering, NLP, LLMs & Transformers, Data Processing, Power BI (DAX, Fabric), Plotly, Pandas, NumPy

Development & Collaboration Tools
Git, GitHub, GitLab, Microsoft Azure, ArgoCD, Grafana, ClickUp, Trello

Operating Systems & Virtualization
Windows / Linux installation, virtual machines

Strengths

Adaptability
Flexibility
Autonomy
Teamwork
Communication
Problem solving

Interests

Reading
Philosophy
Psychology
History
Music

Soraya Codo

Software Engineer | Backend | AI & Data - 3+ years of experience

Backend & AI Engineer combining rigor, attention to detail, and a strong problem-solving mindset in service of reliable and efficient Python systems.

Professional Experience

Software Engineer (Apprenticeship)
From Sept. 2025 to Oct. 2026 Slb (Schlumberger) Montpellier, France

- Developed new features on the MRB (Metering & Revenue Billing) module, handling authorization middlewares and multi-environment configuration
- Investigated bugs and pushed fixes across the importer and exporter modules
- Ensured code reliability through unit testing and ArgoCD/Grafana log analysis
- Migrated the data sharing backend to a new service
- Built Power BI dashboards tracking product adoption, software version usage, user activity and session distribution

Tech stack: Python, OSDU, Techlog, Ocean Plugin, PowerBI, Grafana, Microsoft Azure, Insomnia, ArgoCD, Cockatoo

Software Engineer (Internship)
From Apr. 2023 to Sept. 2023 GéoDigital Cotonou, LI, Benin

- Designed and deployed Django backend systems with authentication, permissions, and API endpoints.
- Built backend architecture for a nationwide activity-monitoring platform.
- Implemented automated tests to ensure code quality and maintainability.
- Integrated REST APIs with React frontend for seamless data flow.
  Tech stack: Django, ReactJs, Postman, Gitlab

Software Engineer (Apprenticeship)
From Oct. 2022 to Mar. 2023 Fasfox

- Built data pipelines to collect and structure business information across France.
- Developed an event-management API to improve internal workflows and team productivity.
  Tech stack: Django, Flask, Gitlab

Volunteering

Python Tutor
Since Jan. 2026 Nexa Digital School Lyon, France
Mentored beginner students in Python fundamentals, designing exercises tailored to non-technical profiles

IT Manager
From Apr. 2025 to Aug. 2025 Ab-project-ee Paris

- Developed a blood-donation tracking application.
- Led data collection via web scraping.
- Managed an agile team to deliver features efficiently.
  Tech stack: Django, Python, VueJs, ClickUp

IT Coach
From 2022 to 2023 Projet PAC - Techchild
Introduced high-school students to web development.

Academic & Personal Projects

Human Rights RAG Chatbot
Python-based multi-PDF ingestion and semantic search over law texts using LangChain, Hugging Face embeddings (Sentence-Transformers) and ChromaDB

NLP (Natural Language Processing)
Trained a text-classification model on Covid-19 posts from X using NLP preprocessing and ML pipelines.

Education

Master's in Artificial Intelligence & Data Management
Since Sept. 2024 Nexa Digital School Lyon, France

Business Mathematics
From May 2024 to July 2024 Université de Laval

Bachelor in Computer Science
From 2020 to 2023 Epitech Technology

Scientific Baccalaureate
From 2012 to 2019 College Catholique Don Zéfirino Agostini
